About Paradigm 3i Solutions

Paradigm 3i Solutions is a serviced disabled veteran owned (SDVOSB) company providing global and international world-class research and medical services to federal, state and local agencies. Our health services division conducts Phase I – IV clinical trials to further the development of medications benefiting patients, communities and physicians around the globe. Paradigm 3i Solutions is building our reputation for producing trial results accurately, quickly and within global guideline requirements.

Why We Collaborate

We work closely with board certified physician researchers affiliated with leading universities and hospitals. Our investigators partner with other skilled staff to perform both inpatient and outpatient studies working with central institutional review boards to eliminate the needs for subsequent medical review. We employ a highly collaborative process between staff and community hospitals, mental health organizations and doctors to identify patients best suited for specific trials. We are committed to overcoming barriers of participation in research within racial and ethnic minority population in the USA by partnering with multi-specialty community based physicians.

Our Value Proposition

We have accepted the challenge to deliver our high level consulting products to customers one at a time. We offer the highest standards and ethics in Study Design and Protocol Development, Clinical Trial and Site Management and Marketing & Minority Patient Recruitment. Paradigm 3i Solutions offers clinical trial development services to the pharmaceutical, biotechnology, medical device industries and federal agencies. We specialize in the strategic development, management and analysis of programs to support clinical research – from Phase I-IV clinical studies to resourcing solutions. Our value is in providing premier solutions for our customers and partners.
